

project

Planning consent and installation of a 50kW ground mounted solar scheme within curtilage of a listed building, and within an area of outstanding natural beauty (AONB).

client

Renewable Energy client, Cornwall

the challenge

- address listed building concerns
- address AONB concerns
- address DNO concerns
- find the best installation partner
- ensure system was installed on time

our approach

- use expertise to work out what solar solutions would be permissible on the site
- prepare a well thought out planning proposal
- work with Cornwall County Council to fully explain proposal
- ensure the client was happy and informed on all aspects of the project
- due diligence on solar PV quotations and selection of installer

the result

Planning permission granted for a 50kW, solar photovoltaic ground mounted system which was commissioned 1 September 2011.

about the client

This was a renewable energy client in Cornwall, who had a listed farmhouse nearby. The solar PV system was installed in a well screened field near a building housing the point of connection and meter.
